Revision History:

Date	Version	Comments
8/19/2019	1.0.0	Single Order Page- 360 view
9/10/2019	1.0.1	Updated sections- Order Timelines & OEX score

Introduction

With the fast-changing customer needs, enterprises are investing in variety of capabilities, acquiring companies and are adopting new business processes. Enterprises are often seen moving away from monolithic architectures to more distributed IT landscape.

This increasing complexity in IT and with hundreds of applications internal and external participating in order life cycle, leads to gaps in E2E visibility causing fragmented customer experience.

Order Experience platform is our investment to define, streamline and simplify E2E order visibility for our business partners and equip them with capabilities to search, analyze, measure and take actions upon distresses across organization.

The definition of an order is varied across our enterprise, Sales Teams deal with Purchase (PO or DPID or IRN), back office Order management deals with Sales orders, our Factory deals with workorders and logistics with packages. Order Experience Platform (OEP) provides simplified view of these varied definitions of the order. Following are the primary features of OEP;

1. Order 360 View
2. Search capabilities
3. Order Summary Dashboard
4. Order Health
5. Order Milestones
6. Intuitive Order Time lines depicting Order stages and order statuses
7. Order Experience Score
8. Predictive Delivery date
9. Action Centers
10. Customizable Microsites
11. Watch-list capabilities
12. Saved searches
13. Reports
14. Manifest View
15. User management & Security

Order 360 View

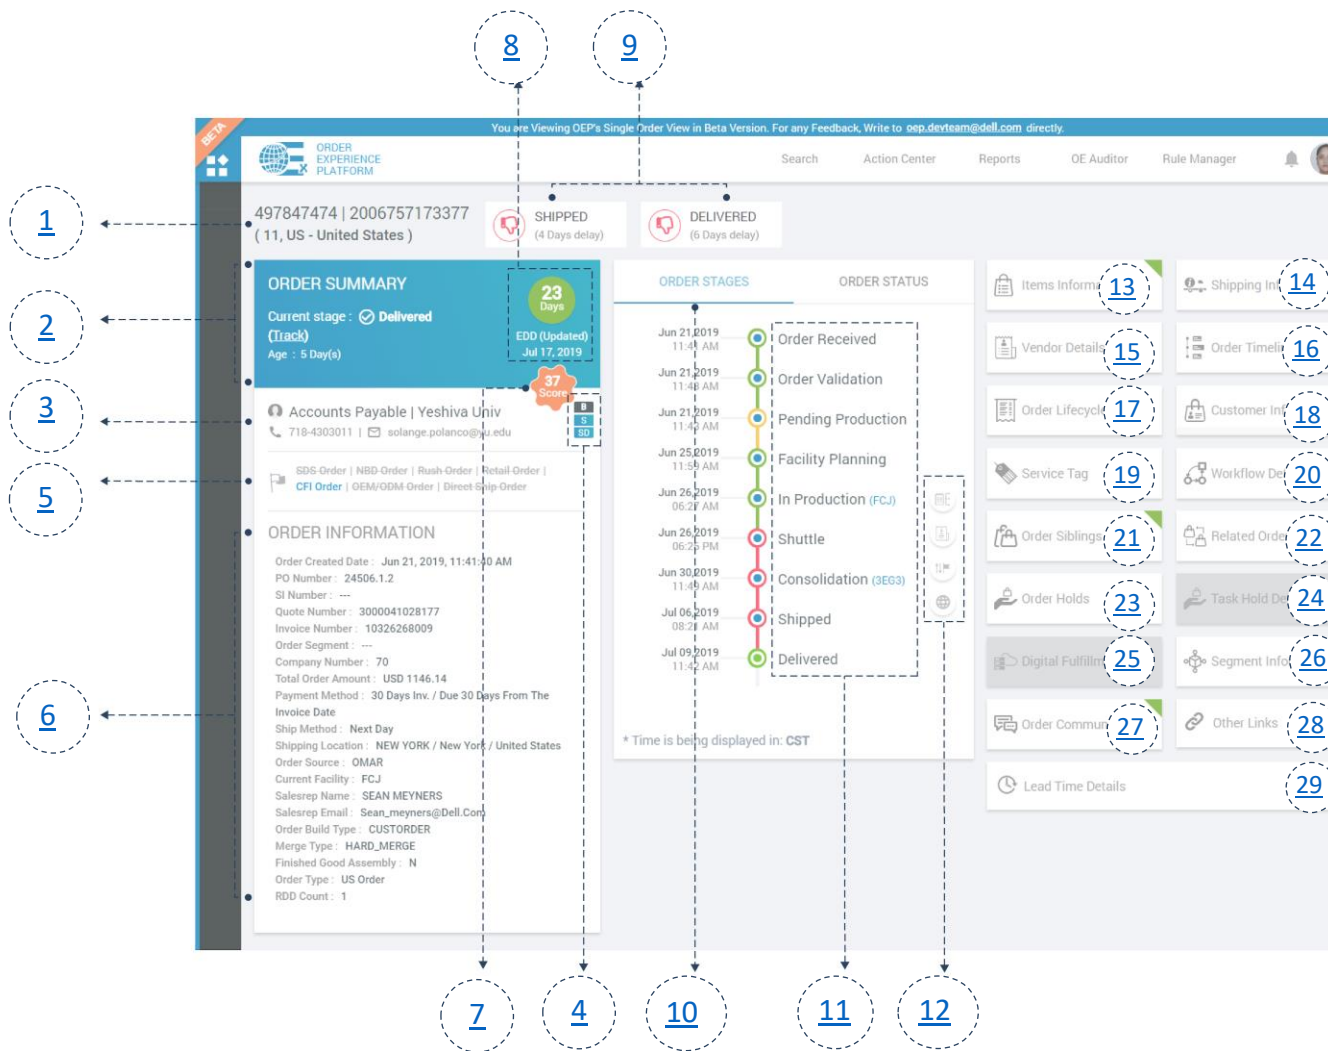

Figure 1 Order 360 view

Single Order Page - Interpretation

On the single order page- order 360 view, user can get the complete details of the sales order such as the order status, order age, billing/shipping/sold to customer information, order timeline, items information, service tags, order holds, order siblings, shipping information, communication details and much more. The further sections will take you through the complete guide of order 360 view and where can a user look for their order details.

Order Information

ORDER NUMBER —

497847474 | 2006757173377
(11, US - United States)

In this section of order 360 View, user can see;

- Sales Order Number
- IRN (Internet Receipt number)
- DPID (Dell Purchase Identifier)
- BUID (Business Unit Identifier)
- ISO Country Code
- Country Name

ORDER SUMMARY —

Current status :  **Delivered** ([Track](#))
Age : 152 Day(s)

User can see the order summary containing the following information;

- Current order Status/Stage (as per timeline chosen by user)
- Total age of the order from the time of order booking
- Current Hold and hold age (If any)

CUSTOMER INFORMATION OVERVIEW —

 Jone Tomy | Jone Tomy
 345-6787654 |  dellprintcfo@dellteam.com

In this section user can see billed, shipped and sold to customer details by switching between 'Bill to customer', 'Ship to customer' and 'Sold to customer' to view their corresponding customer name, phone number and email address.

When user open the order 360 view, by default this section shows 'Bill to Customer' information.

BILLED/SHIPPED/SOLD CUSTOMER —

User can switch between these three buttons to see customer details of billed, shipped and sold to customers.

ORDER TAGS —

User can view the Order tags associated with the current order. Below are the order tags and their denotations;

- a. SDS Order (Same Day Shipping order)
- b. NBD Order (Next Business Day order)
- c. Rush Order
- d. Retail Order
- e. CFI Order (Custom Factory Integration Order)
- f. OEM/ODM Order (Original Equipment Manufacture/ Original Design Manufacturing Order)
- g. Direct Ship Order

ORDER INFORMATION –

User can view the basic order information this section;

Order Information	Order created Date – Order creation date Purchase order number – PO number of the related orders SI Number – Service Integration number Company Number – Company number of the customer Order Source – Order initiated system Order Type – Type of the order	<div> <h3>ORDER INFORMATION</h3> <p>Order Created Date : Jul 22, 2019, 5:55:07 PM</p> <p>PO Number : ---</p> <p>SI Number : ---</p> <p>Quote Number : 3000000768146</p> <p>Invoice Number : 10100169895</p> <p>Order Segment : ---</p> <p>Company Number : 19</p> <p>Total Order Amount : USD 495.26</p> <p>Payment Method : Prepaid / Prepaid With Cash Test1</p> <p>Ship Method : Next Day</p> <p>Shipping Location : SNNDJBAI J STREET / Arizona / United States</p> <p>Order Source : OMAR</p> <p>Current Facility : VIS</p> <p>Salesrep Name : EDD TEST SALES REP</p> <p>Salesrep Email : Donotuse8@Dell.Com</p> <p>Order Build Type : CUSTORDER</p> <p>Merge Type : NONE</p> <p>Finished Good Assembly : N</p> <p>Order Type : US Order</p> <p>RDD Count : ---</p> </div>
Pricing Information	Quote Number – Quote generated for the sales order Invoice Number – Invoice number generated after the order delivery Total Order Amount – Total amount of the order Payment Method – Payment mode	
Sales & Shipping Information	SalesRep Name, SalesRep Email- Sales person information Order Build Type -- Shipping method – mode of shipping the order Merger Type – If any merging exists for the order Current facility- facility name currently the order is with	
Revised Date count	RDD Count - If the EDD is missed and RDD is calculated	

User can view the basic order information in this section, which includes Order Created Date, PO (Customer Purchase Order) Number, SI (Service Integration) Number, Quote Number, Invoice Number, Company Number, Total Order Amount etc.

ORDER EXPERIENCE SCORE —

User can see the order experience score for viewing order. This score is getting calculated with different experiences of the order. The rules are mainly set on following categories;

- a. Delivery Commitment Revision
- b. Invoicing
- c. Logistics
- d. Original Delivery Commitment
- e. Order Processing Performance
- f. Order Communications
- g. Order Cancellation
- h. Order Status Accuracy
- i. Order Visibility
- j. Miscellaneous

On the above set of categories, we define the rule condition and the score (positive/negative). In the order life cycle, accumulative of all the rules we provide the OEX score for each order.

ORDER AGE/EDD —

User can see in this section the number of days lapsed from the time order was confirmed. This section gets updated with respect to the order health. (Currently its green as it's within the EDD)

EDD- Estimated delivery Date for this order is displayed and user can get further details if the EDD was updated.

SHIPPING/DELIVERY —

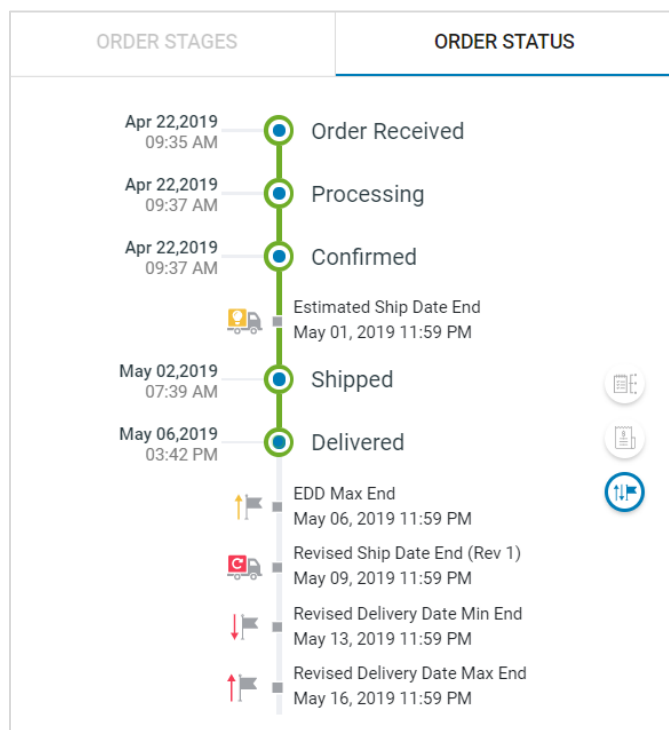

User can view the Shipping and Delivery Status of the order in this section along with SLA days. The shipment and delivery statuses are categorized with four conditions:

- "Shipped/Delivered" ('X' Days early)
- "Shipped/Delivered" (On-Time)
- "Shipped/Delivered" (X Days late)
- "Shipment/delivery Missed" (X days overdue)
- "Pending Shipment/delivery" (X Days remaining)

Order Timelines

ORDER STATUS –

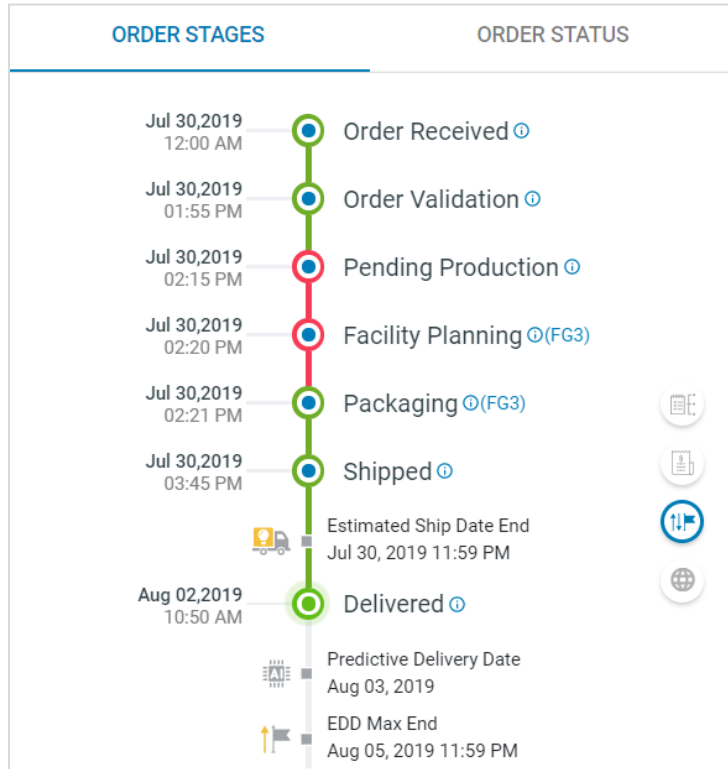

There are two timelines – Order stages and Order status. User can see the order status- Customer communicable timeline. This is a very high-level status that is shared with the customer. Below is the list of statuses:

- Order Received – Order Received by Dell
- Confirmed – Order Confirmed by Dell
- In production – Production started
- Build Complete – Build Complete
- Shipped – Shipment started to customer
- Delivered – Order Delivered to customer

- g. Available – Software Order available for download
- h. Cancelled – Order is cancelled

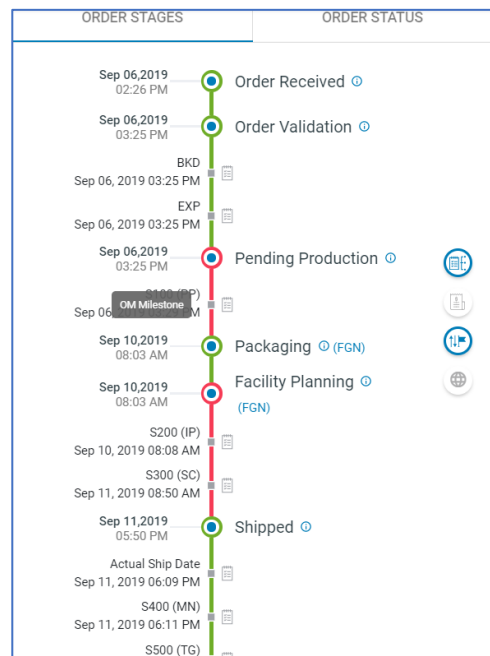

ORDER STAGES—

User can view the order stage in the order timeline that depicts the primary milestones defined by business in the Order lifecycle. Below are the stages that is being captured:

- a. Order Received – Order received in our sales tools
- b. Order Validation – Order validated in order management
- c. Pending Production – Order received in Factories and acknowledged
- d. Facility Planning – Order received in manufacturing facilities
- e. In Production – Production started
- f. Shuttle – Order in shuttle (via ship or road) from manufacturing facilities to shipping facilities
- g. Consolidation – Order packed and boxed and ready for ship
- h. Shipped – Order shipped (to customer's location)
- i. Delivered – Order delivered to the customer.

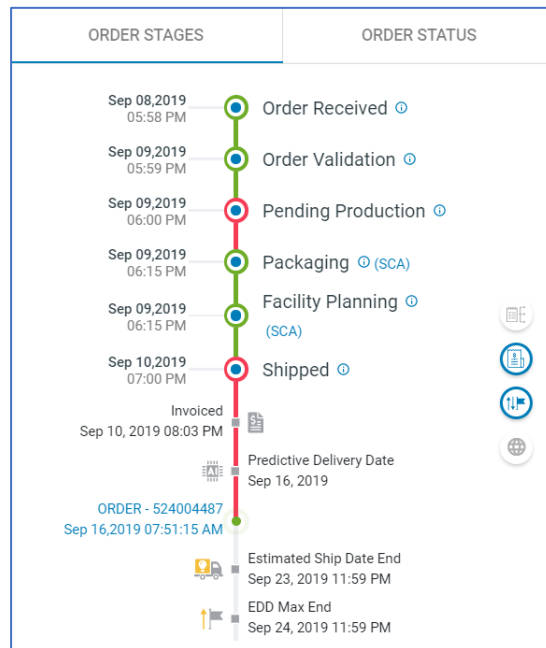

ORDER MANAGEMENT STATUS MILESTONE—

On the order timeline, user can click on the 'order management status milestone' icon to view the business status/events along with the timestamp on the order timeline. This information is received from the OMEGA. Below is the list of Order management statuses:

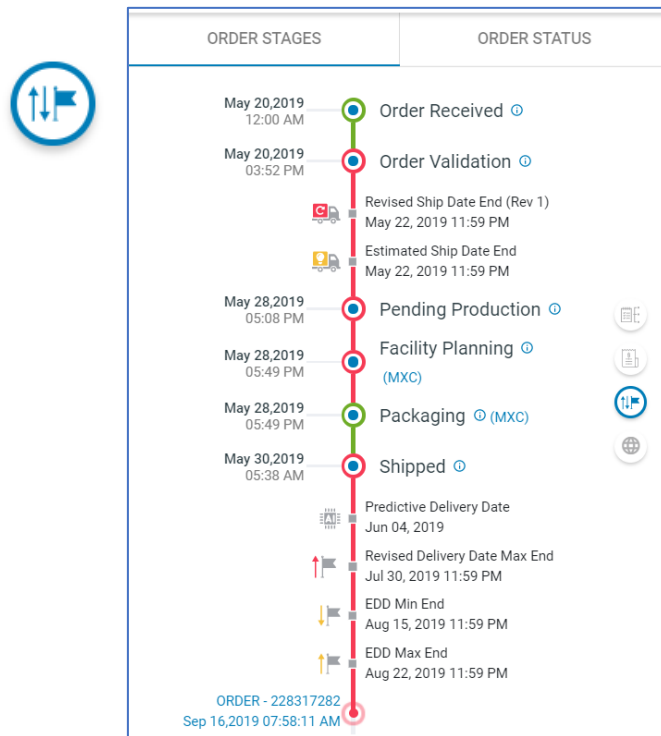

- BKD - Order Booked
- EXP - Export Compliant
- 100(PP) - Pre-Production
- 200(IP) - In-Production
- 300(SC) - Ship Complete
- 400 (MN) - Manifested
- 500 (TG) - Service Tag Attached
- CLD - Closed
- EXW - Ex Warehouse
- EXD - Ex Distributor

ORDER INVOICED MILESTONE—

On the order timeline, user can click on the 'Order Invoiced milestone' icon to view the order invoiced date with reference to order stages/status history.

ORDER COMMITMENT MILESTONE—

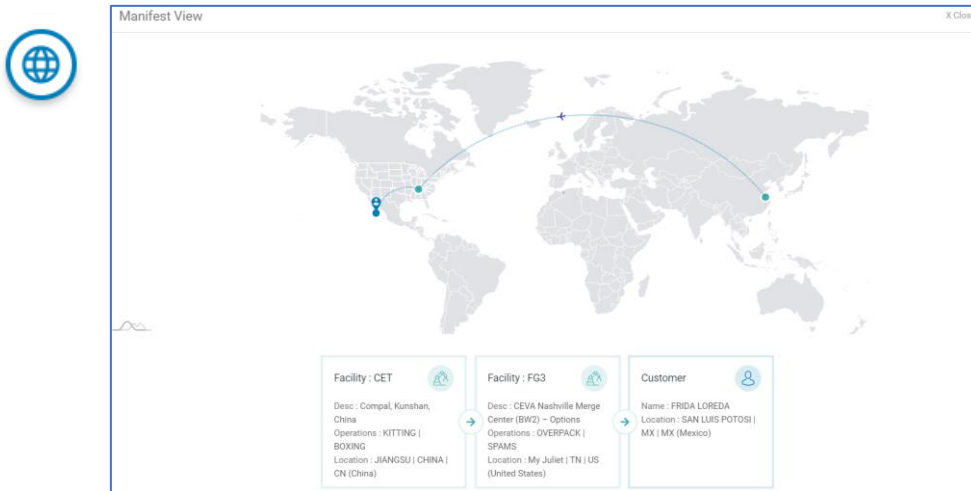

On the order timeline, user can click on the 'Order commitment milestone' icon to view the order estimated shipment/delivery dates. If the ESD/EDD is missed, the system generated revised ship/delivery dates are listed.

On the commitment we are also listing the predictive date depending on the previous order history and the SLA's

- ESD – Excepted Ship Date
- RSD – Revised Ship date with revision count
- EDD min/max – Excepted delivery date min/max
- RDD Min/Max – Revised delivery date min/max
- Actual Ship Date
- Actual Delivery Date
- POD – Proof of delivery
- Predictive Delivery Date

MANIFEST DETAILS—

On the order timeline, user can click on the 'Manifest Details' icon to view the manifest details (kitting facility, boxing facility, SPAMS facility, overpack facility) which includes the customer and facility details.

User can click on 'Order Lifecycle' to view the order information, defined SLA's, order health and timeline.

As part of the Timeline data, user can view;

- Facility Name
- Stage & (indicative stage health & status): Business defined stage with their status and health.
- Actual Start Date: The actual start date is a timestamp when the individual stage has started.
- Actual End Date: The actual end date is a timestamp when the individual stage has ended.
- Expected SLA
- Actual Hours
- Average SLA
- Predicted Start date: Predicted Start Date is the most likely date for the individual order stage to start.
- Order Health: This indicates, how is an order doing with respect to the estimated delivery date (EDD) communicated to customer at the time when order was placed.
 - A red health indicates that an order is likely to miss EDD
 - A Yellow health indicates that an order is quickly approaching EDD but may not miss EDD
 - A green health indicates that an order is likely to reach the customer on or before the EDD

Note: The Predicted date and order health is displayed only on the 'New Version' tab
